

STANDARD IGLOO RANGE

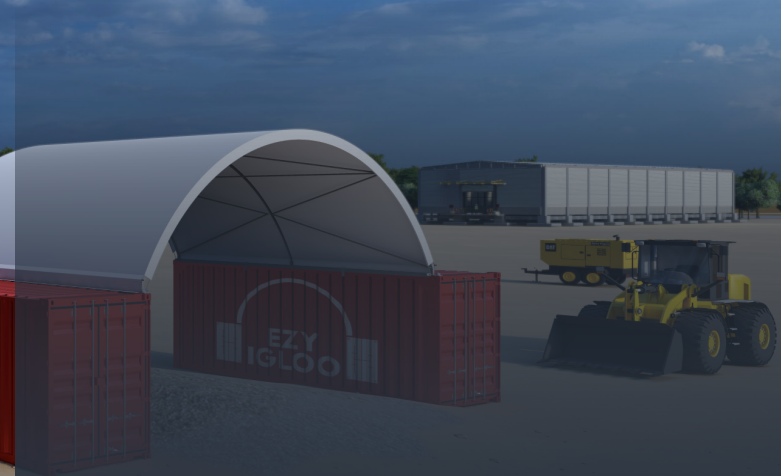

WHY CHOOSE EZY IGLOO?

Ezy Igloo is dedicated to quality, featuring galvanized steel arches and Australian-made poly-fabric covers. Backed by a 10-year Structural Warranty and 20-year UV Warranty, we provide cost-effective solutions without compromising on reliability. With wind ratings for regions A, B, or C, our igloos provide protection from wind, rain, hail, UV, and storms. They are Engineer-certified to Level of Importance 2 and meet AS/NZS 1170 standards.

- ✓ Wide range of sizes in stock and ready for a quick dispatch.
- ✓ Base Rail comes as a standard feature with each igloo.
- ✓ Weld Testing carried out on all Standard Igloo frames.
- ✓ Mill Test Certificate available on all Standard Igloo frames.
- ✓ Full Installation services available with our qualified and experienced crew.

We are an ISO-certified company adhering to ISO 45001 and ISO 9001, demonstrating our commitment to quality, safety, and efficiency. This reflects our dedication to delivering a reliable product while upholding the highest standards.

24-hour dispatch*

- * Standard Igloo only
- * Dispatch is always dependant on stock levels and freight carrier availability.

Time is critical in business, and we understand that some projects can't afford to wait weeks for weatherproof protection or additional storage space.

That's why we proudly offer 24-hour dispatch on our standard igloos.

Because we aim to keep all our standard igloo frames in stock, we can dispatch your igloo once the order is confirmed and paid for. Your container-mounted igloo could be delivered to your doorstep in just days!

If you're flexible with time, our lead times are impressively fast—ranging from just 1-3 weeks for domes with custom accessories to 6 weeks for a fully tailored container dome designed to meet your unique needs.

SPECIFICATION & FEATURES

Mounting Options:

Our standard igloos can be mounted to either General Purpose or High Cube shipping containers. Although, the standard configuration is inside mounted, our domes can also be mounted on the outer edges of the containers or a combination of both. Covering your containers not only provides additional storage above them, but also protects them from the elements.

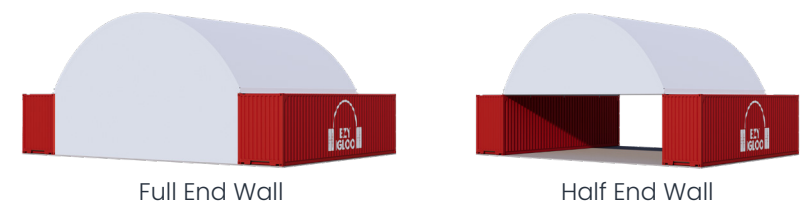

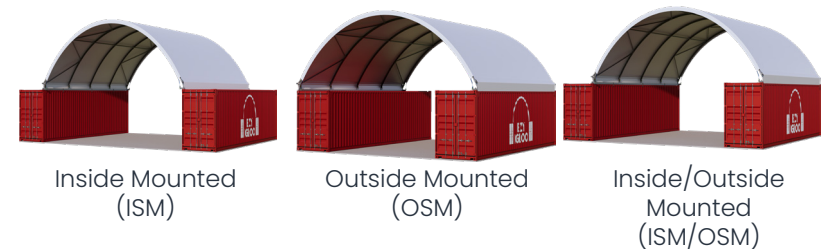

Available Widths and Lengths:

Whilst we have a wide range of sizes, if you need more length, simply add more domes end to end. We will supply you with a Cover Joiner Strip to create a weatherproof seal.

Our available widths to suit 20ft containers are 6m, 9m and 12m. Whilst our 40ft options include 6m, 9m, 12m, 15m, 18m and 21m.

Custom Accessories:

Ezy Igloo offers a complete range of accessories to enhance the functionality of your on-site container shelter, including end walls, access options like roller doors, gates, and PA doors, as well as gutters, lighting, twistlock brackets, and branding. Please note that while these accessories are available with any order, adding them will extend the lead time past 24 hours.
